

UPMC Division of General Internal Medicine

The UPMC Division of General Internal Medicine physicians are dedicated to providing high-quality, comprehensive care. Our practice is a national leader in prevention and management of chronic diseases, and our physicians treat both adult and adolescent patients. We serve as an advanced medical home for our patients, providing coordinated care for patients with complex medical illnesses including diabetes and congestive heart failure. Our practice also provides expertise in women's health including eating disorders, menopause, polycystic ovarian syndrome, and contraception; young adults transitioning from pediatric care with complex medical conditions; and syncope, or loss of consciousness.

We proudly recognize our "Best Doctors" (left to right) Wishwa N. Kapoor, MD, MPH, chief, Division of General Internal Medicine; William I. Levin, MD; Hollis D. Day, MD; D. Michael Elnicki, MD; Peggy B. Hasley, MD, MHS; Michael J. Fine, MD, MSc; Rosanne Granieri, MD; and **Robert M. Arnold, MD**. They are part of a team of over 50 physicians who provide outstanding primary care, hospice care, and palliative care.
